

5 EASY WAYS TO IMPROVE YOUR FACILITY

Neglected

Guard Your Corners

Corners can easily be protected from wheelchairs, carts and gurneys with Acrovyn® Corner Guards. Install these basic, yet effective shields against damage in hallways, cafeterias and all other high-traffic, high-abuse areas.

- ❑ Look for damaged or exposed drywall corners
- ❑ Loose, worn or aging corner guards
- ❑ Potential “snag points” of equipment and clothing

Protected

Upgrade Your Handrails

Acrovyn® Handrails are shock-absorbing, protect walls and aid in resident mobility while offering safety & security. Our Handrails are compliant with ADA requirements and will meet the approval of state inspectors.

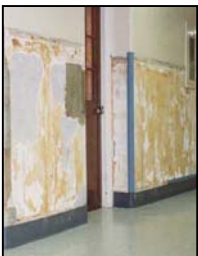

- ❑ Examine for loose, unsafe or unsecured handrails & brackets
- ❑ Chipped, peeling or worn finishes – especially older, wooden rails
- ❑ Non-compliant handrails with less than 1½ inch ADA grip surface

Defend Your Walls

Don't overlook damage risks to walls from chairs, carts and dollies. Install Acrovyn® Accent Rails, Crash Rails, Bumper Guards, Bed Locators and Cove Base to prevent costly & unsightly damage below the wainscot level.

- ❑ Inspect for gouges, scratches and impacts to lower wall surfaces
- ❑ Damaged, scraped or chuffed walls behind resident beds
- ❑ Loose, stained or unsightly cove base along floors

Preserve Your Wall Surfaces

Don't just cover your walls, protect them with Acrovyn® Wall Coverings. Install protective Semi-Rigid and Rigid Wall Coverings in hallways, rooms, corridors and cafeterias as your first line of defense against damage.

- ❑ Identify wall surfaces needing constant patching & painting
- ❑ Dirty, dingy wall surfaces that are unsanitary and difficult to keep clean
- ❑ Peeling, torn or tattered wallpaper needing replacement

Protect Your Doors & Frames

Wheelchairs, carts and gurneys slam into doors every day leaving scratches, dents and scuff marks. Install no-maintenance Acrovyn® Kick Plates, Push Plates and Door & Frame Protectors to eliminate these annoying problems.

- ❑ Look for scratches, scuff marks and dents on doors & frames
- ❑ High-traffic, high-impact doorways needing constant paint and repair
- ❑ Access, closet, resident & all other doorways where damage occurs

DecoLink® provides long-term care facilities with factory-direct savings, personalized service & solutions proven to help you with state surveys.
