

How will C/S Acrovyn® Door & Frame Protection from DecoLink Help Your Facility?

Damage to unprotected door and frame

Door protected by Door and Frame Protection

**We think pictures speak for themselves.
But on the other hand so do our customers.**

“It's a cost savings, pure and simple. It just saves money and it's maintenance free. These products do a great job protecting the door. There's just nothing else to do except wipe it off once in a while. Saved us a lot of time, money and labor.”

Earl Walker, Maintenance Director, University Nursing Rehabilitation, Athens, GA

“These will really help during inspections because the state surveyors look at every facet of your building and the biggest thing they look for are scratches and nicks. The appearance is just neater and nicer than a well-painted door. They are worth their weight in gold.”

Anthony Goff, Plant Services Supervisor, Beaver Dam Healthcare Manor, Beaver Dam, KY

“Installation was very easy. You just can't keep painting and repainting the doors every day. These even look better than a freshly painted door. What would I say to those still painting? Get door and frame protectors - they're a lifesaver, believe me!”

Larry Shoats, Environmental Services Director, Jersey Shore Nursing Home, Eatontown, NJ
