

USGBC LEED® Credit Contributions: C/S Sun Controls

MR Credit 4, Recycled Content:

C/S sources materials with the highest possible recycled content for all sun control products. Contact us for the most up-to-date recycled content percentages.

EA Credit 1, Optimize Energy Performance:

A shading strategy that utilizes fixed and operable sun controls has a significant impact on this credit by reducing the energy demands of HVAC and lighting systems.

IEQ Credits 8.1 and 8.2, Daylight and Views:

Daylighting technologies including solar shading and lightshelves are recommended to meet the intent of this credit.

ID Credit:

C/S Suspended, Cantilevered, Horizontal, Vertical, Shadowline™ and Perform™ sunshades in clear anodized finish have all achieved Cradle to Cradle: Silver Certification.

Contact us to speak with one of our LEED Accredited Professionals to learn more about LEED or how our products can help contribute to your project's goals.

For more than 50 years C/S Sun Controls have been meeting complex project requirements by mitigating solar heat gain, managing daylight and reducing glare. By contributing to lower energy consumption and a healthier indoor environment, our systems have always been designed to help you meet your high performance building goals.

Our complete package of shading and daylighting solutions includes fixed and controllable exterior sunshades, WAREMA external venetian blinds and interior lightshelves. Combine this with half a century of experience with custom applications and there is no question that Construction Specialties is the right partner for your next sun shading project challenge.
