

Specifier Checklist

The following items are important to be included in any CS Entrance Flooring System specification:

- Model (i.e. Pedimat, GridLine, etc.)
- Finish (if applicable - mill, anodized, power coat)
- Insert (if applicable - carpet, recycled rubber, etc.)
- Frame (if applicable - level base, tapered angle, etc.)
- Rolling load (i.e. 500 lbs/wheel)
- Unique items (i.e. drain pans, paints, supports, alloys, etc.)
- Recess conditions/prep (if applicable)
 - Quality assurance standards to be required of the concrete contractor and the product installer to ensure proper fit and function of the product.
