Installation Guidelines:

The blockouts must be prepared to receive the joint cover. It is recommended that the blockout be formed a minimum of 1/8" deeper to allow the base to be leveled prior to installation of the joint cover. Apply a high-strength leveling grout to the base of the blockouts to provide a continuous, solid, flat and level base for the joint cover. (Note: The blockouts must be level across the joint opening.) Install base frames with C/S supplied fasteners. Set center plate over frames and snap cover plates into base frames.
