

**Project:** Community Regional Medical - Trauma Center  
San Francisco, CA

**Architect:** RTKL Associates, Inc.  
Chicago, IL

**Products:** C/S 200-4, 100-3 Sun Controls

This level 1 trauma center provides central California residents with the highest level of care available in the region. Affiliated with the University of California San Francisco Medical School, one of the top medical schools in the nation allows access to some of the brightest medical specialists in the country. The first hospital in the world to offer Generation 4 CyberKnife technology for treating cancer, also has a comprehensive burn center, the Da Vinci Surgical System, hip & knee replacement and is one of only a few hospital in the nation chosen to administer the HeartMate II a lifesaving heart pump for patients awaiting a heart transplant.

### At a Glance

- C/S Vertical Sunshades have longspan airfoil blades
- Radiused sunshades appear to be curved
- Sunshades are mounted with tee brackets to curtainwall system
- Vertical sunshades shield each patient room providing filtered natural light
- Cradle to Cradle Certified™ Silver\*

\*Clear anodized and C/S Powder Coat Finishes

To provide maximum sun control at the entrance to this California Medical Center, RTKL specified a C/S Vertical Sunshade with longspan airfoil blades. The radiused sunshades are anchored to the curtain wall system using tee brackets. On the patient wing C/S Vertical sunshades are used in front of each patient room to reduce heat and glare, while providing natural filtered sunlight into the interior and reducing the need for artificial light.
