

## CS Entrance Flooring Systems (Select Models and Finishes) *Cradle to Cradle Certified™* Silver v3.1 Specification Sheet

CS Entrance Flooring has become the industry standard for architectural entrance mats and grids since its introduction 40 years ago. Effectively stopping dirt and water from entering a building is the main reason architects and owners specify CS Entrance Flooring Systems.

*Cradle to Cradle Certified™* levels achieved by CS Entrance Flooring products are based on the lowest assessment level of model variations and finishes selected. Review model notes to see if optional items could lower the model's certification level. In some cases, there are noncertified model variations that are exceptions to current certification. For description and pictures of models and finishes, visit [www.c-sgroup.com/efs](http://www.c-sgroup.com/efs)

Only the following models and finishes are considered *Cradle to Cradle Certified™* Silver within the scope of certification #3211 valid August 1, 2017 to July 31, 2019.
